PROJECT 1 OF 3

Awarded

United Kingdom

Power & Transmission

NGED substation civil works framework, 132kV to 11kV, United Kingdom

\$796.0M

Framework value awarded by National Grid UK

National Grid UK has awarded a civil works framework for 132kV, 66kV, 33kV and 11kV substations on the NGED distribution network, covering new and refurbished substation sites, per UK Find a Tender.

PROJECT 1 OF 3 • THE OPPORTUNITY

NGED substation civil works framework, 132kV to 11kV, United Kingdom

WHO

Owner: National Grid UK Limited. Contractors: A I & Z A Grant, Alpha Construction, Alun Griffiths, Amalgamated Construction and others.

OPPORTUNITY FOR

This is an awarded framework, so the next step is subcontracting by the named contractors. That opens work for suppliers of cable ducts, fencing, drainage and building materials, and for crews who can work in live substations.

KEY FACTS

- The lot in the notice covers the NGED network zones of Redruth and Bodmin
 - Works will often be carried out in a live substation environment
 - Scope also covers building maintenance: roofs, glazing, joinery, trench covers, doors and gates
-

WHAT TO WATCH

Call-offs under the framework. The notice says these may include protecting substations from flooding, high winds and high humidity.

PROJECT 2 OF 3

Awarded

EGY

Wind

Shadwan 900 MW onshore wind project, Egypt

\$716M Total capex, 900 MW Shadwan onshore wind

Scatec, in partnership with EDF power solutions, has started construction of the 900 MW Shadwan onshore wind project in Egypt, Scatec announced on 1 October 2026.

PROJECT 2 OF 3 • THE OPPORTUNITY

Shadwan 900 MW onshore wind project, Egypt

WHO

Owner: Scatec with EDF power solutions. EPC: Not named in the report. Scatec says it will deliver the project through its integrated model.

OPPORTUNITY FOR

Construction has started on one of Africa's largest onshore wind farms, per Scatec. Scatec is using its own D&C activities, so equipment and construction subcontractors should approach Scatec directly.

KEY FACTS

- Scatec signed equity bridge loans totalling USD 150M with The Arab Energy Fund
 - A joint development agreement with EDF targets a 29% equity stake in Shadwan
 - Expected output is about 4 TWh a year, avoiding an estimated 1.6m t of CO2 a year
-

WHAT TO WATCH

Scatec says it intends to invite additional equity partners into the project.

PROJECT 3 OF 3

Awarded

MYS

LNG Infrastructure

FSRU-based LNG import terminal, Sarawak, Malaysia

1 Oct 2026

Hoegh Evi–Petros deal reported by
LNG Prime

Hoegh Evi and Petros have signed a deal to jointly develop an LNG import terminal in Malaysia's Sarawak state, LNG Prime reports.

PROJECT 3 OF 3 · THE OPPORTUNITY

FSRU-based LNG import terminal, Sarawak, Malaysia

WHO

Owner: Petros and Hoegh Evi (joint developers). EPC: Not named in the report.

OPPORTUNITY FOR

This is a joint development deal, not a construction award. It is early, so FSRU, marine and regasification suppliers can follow it, but no scope or value has been reported yet.

KEY FACTS

- LNG Prime describes Hoegh Evi as a Norwegian FSRU player
 - Petros is Sarawak's state-owned oil and gas company
 - The terminal will be FSRU-based, per LNG Prime
-

WHAT TO WATCH

Details of capacity, site and schedule. None appear in the available LNG Prime text, which is paywalled.
