THE WEEK AT A GLANCE

113 new projects in 55 countries over the last 7 days. The three most significant, then the rest.

- **Boskalis wins Zeevonk phase one inter-array cable contract**

NLD · Awarded · slides 3–4

- **TotalEnergies takes FID on Absheron full-field gas development**

Azerbaijan · Awarded · slides 5–6

- **Elevra starts \$366m North American Lithium mine expansion in Quebec**

Canada · Awarded · slides 7–8

ALSO ON THE RADAR

- **Construction work for gas pipelines – 24/006 - The Provision of Network Services and Works To Gas Networks Ireland**

Ireland · Awarded · Pipelines & Storage

- **Velaro Novo Train Supply**

Vietnam · Awarded · Rail & Inland Transport

- **Heavylift Newbuilds**

China · Awarded · Shipyard & Fleet

- **Australia's Largest Engine Power Plant**

Australia · Awarded

- **Railway maintenance works – Replacement of track components**

Romania · Awarded · Rail & Inland Transport

PROJECT 1 OF 3

Awarded

NLD

Wind

Boskalis wins Zeevonk phase one inter-array cable contract

149 km

66 kV inter-array cables linking 69 turbines

Boskalis has won what it calls a "sizeable" contract to transport and install inter-array cables for the first 1 GW phase of the 2 GW Zeevonk offshore wind project. In Boskalis' classification, sizeable means €50m to €150m.

PROJECT 1 OF 3 • THE OPPORTUNITY

Boskalis wins Zeevonk phase one inter-array cable contract

WHO

Owner: Vattenfall and Copenhagen Infrastructure Partners JV.
Installer: Boskalis. Cable supplier: TKF.

OPPORTUNITY FOR

An awarded installation scope with engineering starting soon. It matters to survey, cable protection system, seabed intervention and offshore support suppliers ahead of the 2029 campaign. A second 1 GW phase follows.

KEY FACTS

- Cables will ship from the Eemshaven factory on Boskalis' cable-laying vessel Boka Ocean.
 - The site lies 63-84 km off the Dutch coast near Bergen aan Zee (IJmuiden Ver Beta).
 - Phase two, due in 2032, adds 1 GW plus 500 MW of system integration, including an electrolyzer.
-

WHAT TO WATCH

Boskalis expects engineering to start shortly, ahead of the offshore installation campaign planned for 2029.

TotalEnergies takes FID on Absheron full-field gas development

6 bcm/y

Gas output target, plus 47,000 b/d condensate

African Mining Market reports that TotalEnergies and its partners confirmed FID on full-field development of the Absheron gas and condensate field. The field is in the Caspian Sea, about 100 km southeast of Baku. Start-up is expected in 2029.

PROJECT 2 OF 3 • THE OPPORTUNITY

TotalEnergies takes FID on Absheron full-field gas development

WHO

Operator: TotalEnergies (35%). Partners: SOCAR (35%), XRG (30%). EPC: Not named in the report.

OPPORTUNITY FOR

FID moves a large offshore gas and condensate development into execution. It matters to EPC contractors, offshore fabricators and equipment suppliers, since execution packages come next. No contractors are named.

KEY FACTS

- The initial phase has produced since 2023: 1.5 bcm of gas and 12,000 b/d of condensate.
 - FID came the same day as TotalEnergies' Strategy and Outlook presentation.
 - CEO Patrick Pouyanné called Absheron a low cost, low emissions project.
-

WHAT TO WATCH

Contractor appointments for the full-field build, which the report does not name, ahead of the 2029 start-up.

Canada

Mine Development

Elevra starts \$366m North American Lithium mine expansion in Quebec

373,000 t

Annual spodumene concentrate after expansion, vs 199,000 t

The Northern Miner reports that Elevra Lithium has started building a \$366m (US\$271m) three-stage brownfield expansion of its North American Lithium mine in Quebec. The expansion adds milling, flotation, filtration and crushing capacity.

PROJECT 3 OF 3 • THE OPPORTUNITY

Elevra starts \$366m North American Lithium mine expansion in Quebec

WHO

Owner: Elevra Lithium. EPC: Not named in the report.

OPPORTUNITY FOR

A brownfield expansion now in execution. It matters to suppliers of milling, flotation, filtration, crushing and ore sorting equipment and to site contractors. Stages two and three run to mid-2028 and mid-2029.

KEY FACTS

- Stage one adds 15-20% to output from mid-2027. CEO Lucas Dow expects first extra tonnes in June.
 - Stage two lifts milling capacity to 6,500 tonnes per day in mid-2028.
 - The prefeasibility study shows a \$943m post-tax NPV (8%), 50% IRR and 34-month payback.
-

WHAT TO WATCH

Elevra is negotiating another price-protected offtake, and stage one output is due from mid-2027.
