Editor's note

A quieter week: 71 EPC items against 91 last week, and tenders down from 35 to 20. What did land was long-dated. Bouygues Energies & Services and Eiffage Energie Systemes took a US$202m French electrical networks framework for 2027-2030, and MISC lined up five more LNG carriers for Petronas on 20-year charters. For bidders and buyers the message is that capacity is being booked years ahead, so missing this round of frameworks and charters means a long wait for the next opening.
