SIGNAL 1 OF 3

Critical

Energy

Russia puts refinery, contract and tanker data under secrecy

3.8m b/d

Russian refinery throughput by June, down 30% y/y (IEA)

Putin signed a decree Monday that makes refinery output figures, export contracts and tanker routes off-limits to public reporting in Russia, Reuters reported.

SIGNAL 1 OF 3 · WHY IT MATTERS

Russia puts refinery, contract and tanker data under secrecy

WHY IT MATTERS

Buyers and charterers of Russian crude and products lose public data on contract terms, buyers, shipping routes and vessel positions at export terminals. The decree ties this to sanctions, arguing the price cap is harder to police.

KEY FACTS

- Customs statistics and planned exchange sales volumes are also covered, unless a company discloses its own figures.
 - Ukrainian drones hit a Russian refinery every three days on average in the first eight months of 2026.
 - Gasoline output is down roughly 20% and diesel nearly 30%; fuel shortages are reported in 92% of Russian regions.
-

WHAT TO WATCH

Company self-disclosures, the decree's only exemption, and supply to India, which Reuters reports is tightening on reduced exports and strong Chinese demand.

SIGNAL 2 OF 3

Critical

Shipping

ADNOC and KPC lift naphtha exports to Asia via STS transfers

1.6m vs 5m t

ADNOC+KPC naphtha exports,
Aug-Sep 2026 vs Aug-Sep 2025

ADNOC and KPC shipped almost 1.6m t (about 14m bbl) of naphtha in August and September, up from around 700,000 t in March-April, mostly via ship-to-ship transfers, according to trade shipping data reported by Reuters.

SIGNAL 2 OF 3 • WHY IT MATTERS

ADNOC and KPC lift naphtha exports to Asia via STS transfers

WHY IT MATTERS

Reuters reports that Gulf naphtha bound for Asia is moving around the Strait of Hormuz through STS transfers off Oman and loadings at Fujairah. Volumes are still about a third of the 5m t the two shipped in Aug-Sep 2025 (Kpler).

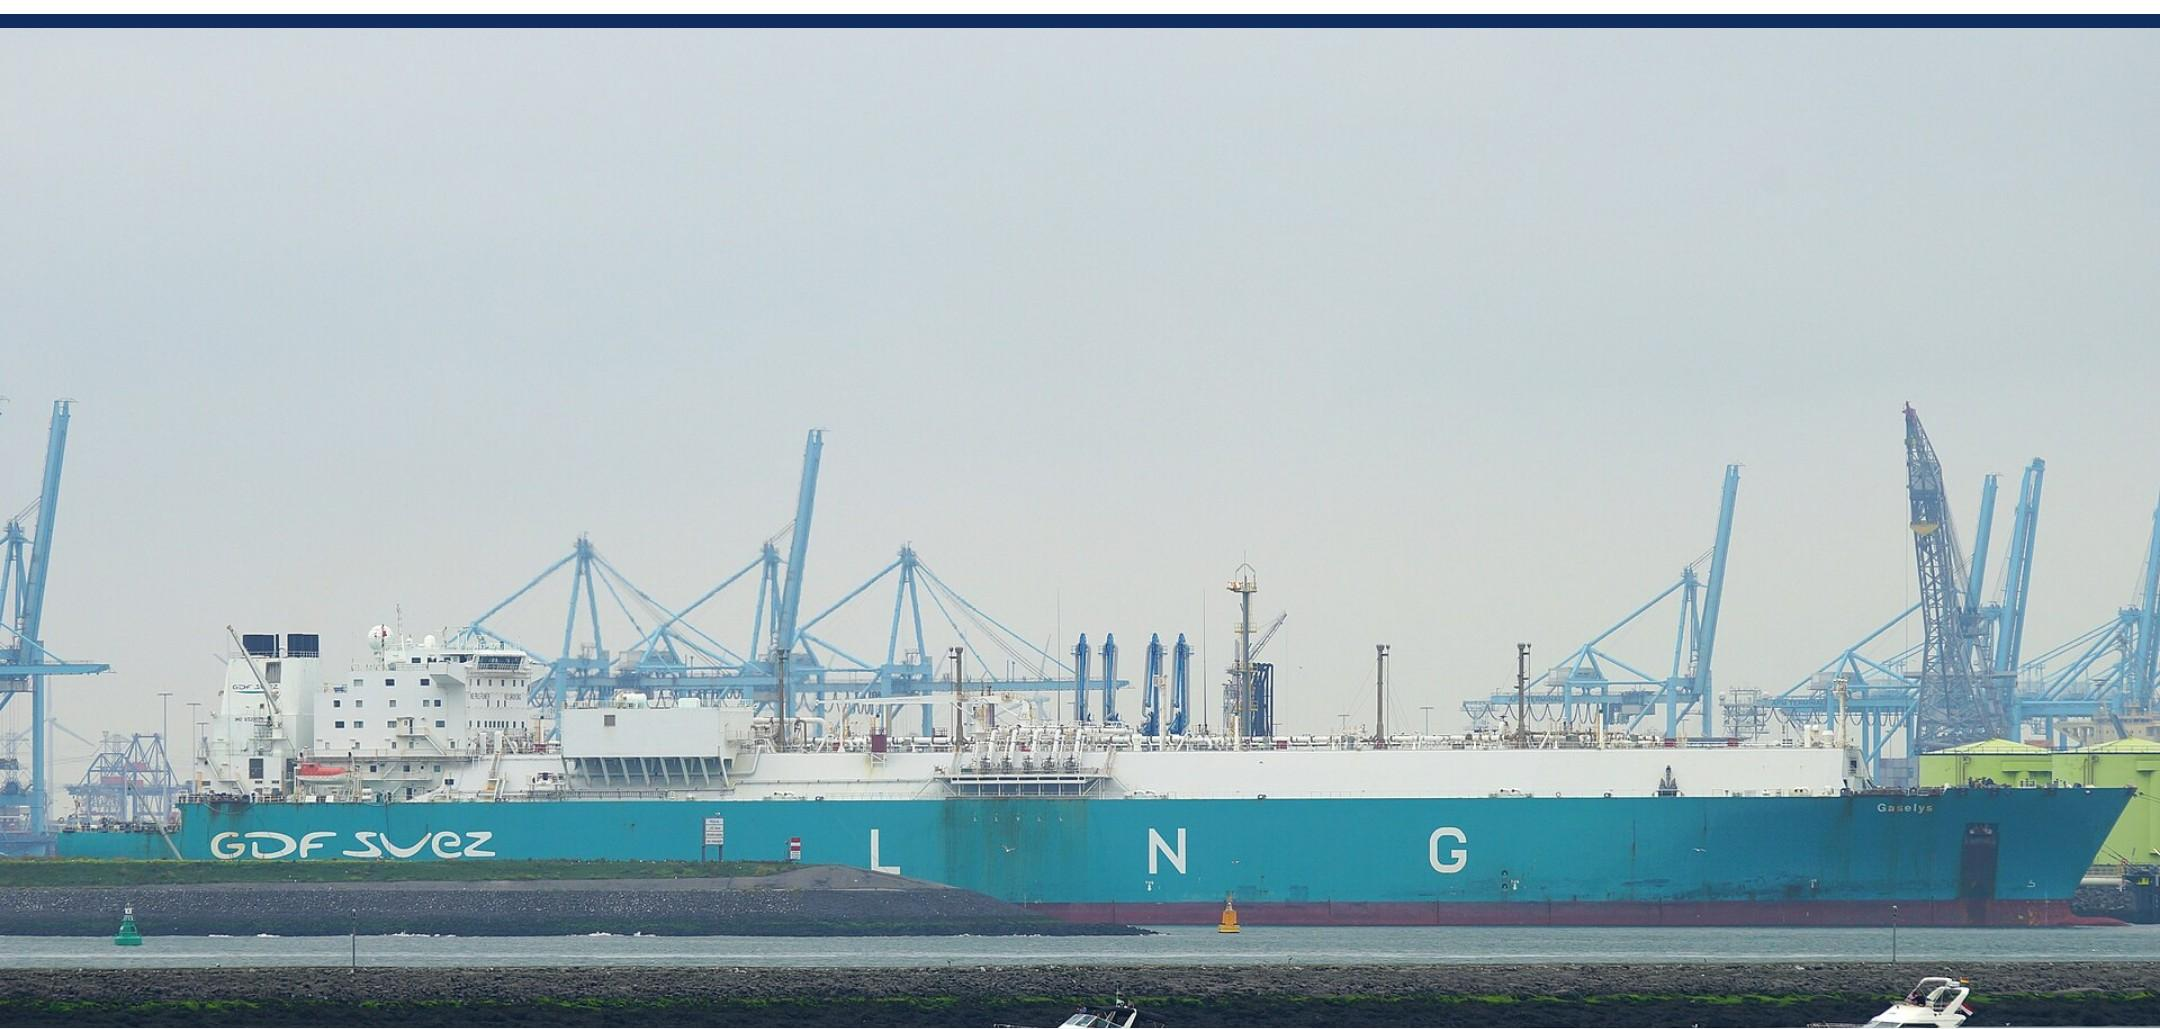

KEY FACTS

- ADNOC's chartering arm loaded about 1.5m t onto 25 vessels for STS transfers off Sohar, Oman.
 - KPC shipped three cargoes totalling about 180,000 t, according to the trade data.
 - FGE NexantECA says Fujairah re-exports and naphtha trucked in from other UAE ports have picked up substantially.
-

WHAT TO WATCH

Whether KPC goes beyond three cargoes and ADNOC holds its Sohar STS pace. Reported volumes may be understated because many vessels switch off their transponders.

Energy

Strait of Hormuz

Qatar extends LNG force majeure to end-November

18 vs 509

Qatar LNG cargoes exported, same period a year apart (ICIS)

QatarEnergy extended force majeure on LNG deliveries by another month, from end-October to end-November. It notified buyers in Bangladesh and Pakistan, at least one in India, and Italy's Edison, Bloomberg reported.

SIGNAL 3 OF 3 · WHY IT MATTERS

Qatar extends LNG force majeure to end-November

WHY IT MATTERS

The Hormuz LNG flow to Asia remains largely blocked. Reuters calculated that Qatar's exports fell by as much as 96% and it lost \$24bn in sales over six months. The affected buyers will go without Qatari cargoes for at least another month.

KEY FACTS

- Edison says it will not receive cargoes until early December, under a force majeure first issued in April.
 - Last month Qatar had extended the force majeure for Edison until early November.
 - Some Qatari and UAE LNG cargoes have recently transited Hormuz or used STS transfers outside the Strait.
-

WHAT TO WATCH

QatarEnergy's next notice as the end-November deadline approaches, and whether Edison's early-December restart holds.
