SIGNAL 1 OF 3

Critical

Energy

Putin decree takes Russian refinery, contract and tanker data off the record

3.8m b/d

IEA: Russian refinery throughput by June, down 30% y/y

Under a decree Putin signed Monday, refinery output figures, export contracts, customs statistics and tanker routes can no longer be reported publicly in Russia, Reuters reported.

SIGNAL 1 OF 3 · WHY IT MATTERS

Putin decree takes Russian refinery, contract and tanker data off the record

WHY IT MATTERS

Buyers and charterers lose public data on Russian product volumes, buyers, routes and vessel positions at export terminals. Per oilprice.com, the decree is tied to sanctions enforcement: less verifiable data makes the price cap harder to police.

KEY FACTS

- Restricted: product names, quantities, prices, buyers, sellers, payment terms, vessel coordinates at terminals
 - Ukrainian drones hit a Russian refinery every three days on average in the first eight months of 2026
 - Gasoline output down roughly 20%, diesel nearly 30%; fuel shortages reported in 92% of regions
-

WHAT TO WATCH

Companies disclosing their own figures is the only exemption. Reuters separately reports Russian oil supply to India tightening on reduced exports and Chinese demand.

SIGNAL 2 OF 3

Critical

Shipping

UAE and Kuwait send naphtha to Asia around Hormuz via STS off Oman

1.6m t

ADNOC and KPC naphtha exports, Aug-Sep (700,000 t Mar-Apr)

ADNOC and KPC shipped almost 1.6m t (about 14m bbl) of naphtha in August and September, up from about 700,000 t in March-April, largely via STS transfers outside Hormuz, per trade data cited by Reuters.

SIGNAL 2 OF 3 · WHY IT MATTERS

UAE and Kuwait send naphtha to Asia around Hormuz via STS off Oman

WHY IT MATTERS

Gulf naphtha for Asia is moving around the Hormuz blockage through STS transfers off Sohar and Fujairah loadings. Volumes remain well below the 5m t the pair exported in Aug-Sep 2025, per Kpler data.

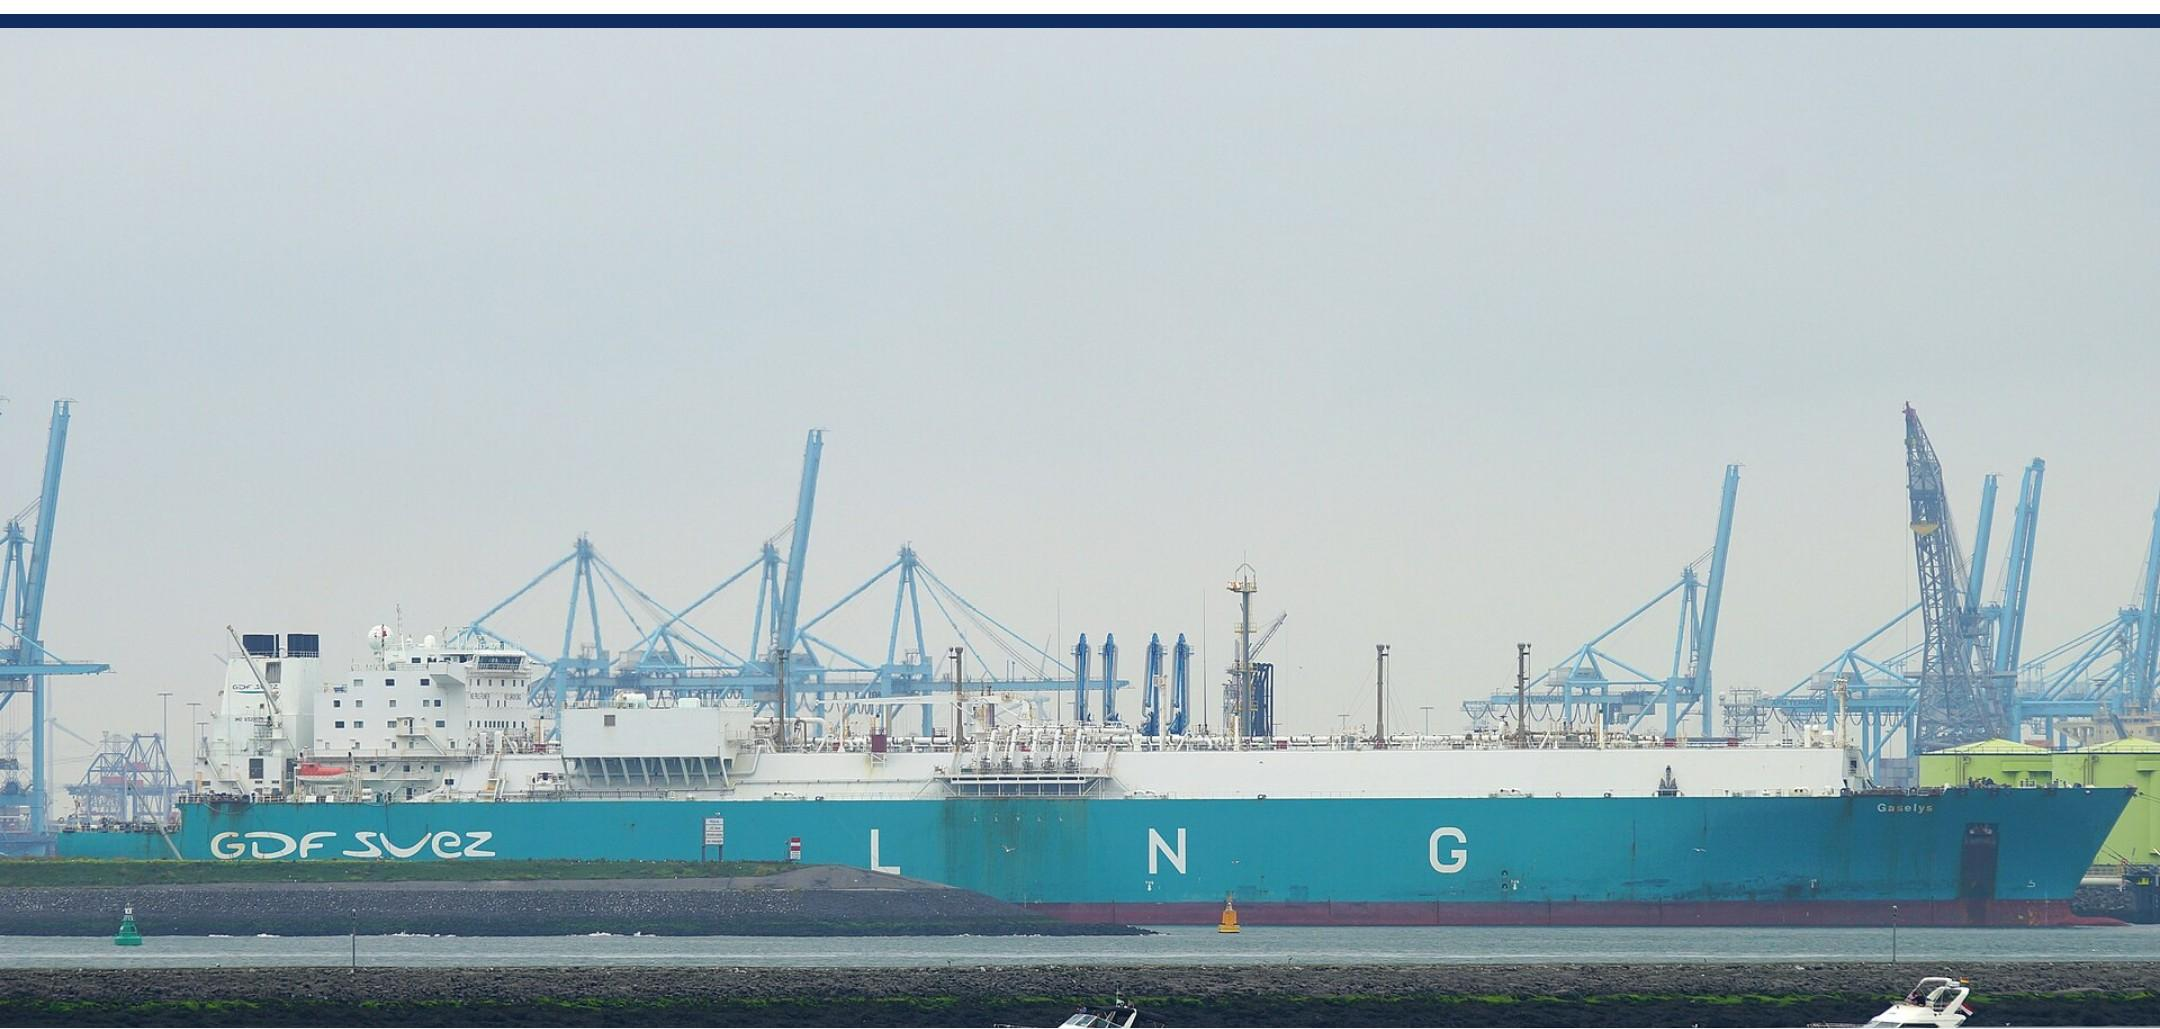

KEY FACTS

- ADNOC's chartering arm loaded about 1.5m t onto 25 vessels for STS off Sohar, Oman
 - KPC shipped three cargoes totalling about 180,000 t
 - FGE NexantECA: Fujairah re-exports and naphtha trucked from other UAE ports have picked up substantially
-

WHAT TO WATCH

Watch the next shipping data on STS loadings off Sohar. Reported volumes may understate flows because many vessels switch off transponders.

SIGNAL 3 OF 3

Critical

Energy

Strait of Hormuz

Qatar extends LNG force majeure to end-November, Hormuz largely blocked

18 vs 509

Qatar LNG cargoes exported, same period a year apart (ICIS)

QatarEnergy extended force majeure on LNG deliveries to Asia and Europe by a month to end-November, Bloomberg reported. Edison says it will get no cargoes until early December.

SIGNAL 3 OF 3 · WHY IT MATTERS

Qatar extends LNG force majeure to end-November, Hormuz largely blocked

WHY IT MATTERS

Strait of Hormuz (Gulf crude, LNG & products → Asia): LNG cargo traffic remains largely blocked, which cuts Qatari supply to buyers in Bangladesh, Pakistan, India and Italy for another month.

KEY FACTS

- Reuters calculated \$24bn in lost sales, with exports down as much as 96%
 - Force majeure was first issued in April after disruptions caused by the US-Iran war
 - Edison's previous date was early November; Asian buyers' was end-October
-

WHAT TO WATCH

The end-November expiry for Asian buyers and early December for Edison: whether QatarEnergy extends force majeure again.
