Energy

Putin decree takes Russian refining and export data off the public record

3.8m b/d

Russian refinery throughput by June per IEA, down 30% y/y

Refinery output, export contracts and tanker routes can no longer be reported publicly in Russia under a decree Putin signed Monday, Reuters reported, per oilprice.com.

SIGNAL 1 OF 3 · WHY IT MATTERS

Putin decree takes Russian refining and export data off the public record

WHY IT MATTERS

Buyers, sellers, quantities, prices, shipping routes and vessel positions at export terminals are now restricted. Per oilprice.com, the decree is tied to sanctions: the less the West can verify, the harder the price cap is to police.

KEY FACTS

- Customs statistics and planned sales volumes on commodity exchanges are also covered by the decree.
 - Ukrainian drones hit a Russian refinery every three days on average in the first eight months of 2026.
 - Gasoline output is down about 20% and diesel nearly 30%; fuel shortages are reported in 92% of regions.
-

WHAT TO WATCH

Whether any Russian company chooses to publish its own refining or export figures, the only exception the decree allows.

Critical

Shipping

UAE and Kuwait lift naphtha exports to Asia via STS outside Hormuz

1.6m t

ADNOC + KPC naphtha, Aug-Sep, vs ~700,000 t in Mar-Apr

ADNOC and KPC shipped almost 1.6 million t (about 14 million barrels) of naphtha in August and September, mostly via ship-to-ship transfers, according to trade data reported by Reuters and MarineLink.

SIGNAL 2 OF 3 · WHY IT MATTERS

UAE and Kuwait lift naphtha exports to Asia via STS outside Hormuz

WHY IT MATTERS

Gulf naphtha to Asia is being routed around Hormuz through STS transfers off Sohar, Oman. Volumes are still well below the about 5 million t both companies shipped in Aug-Sep 2025, per Kpler.

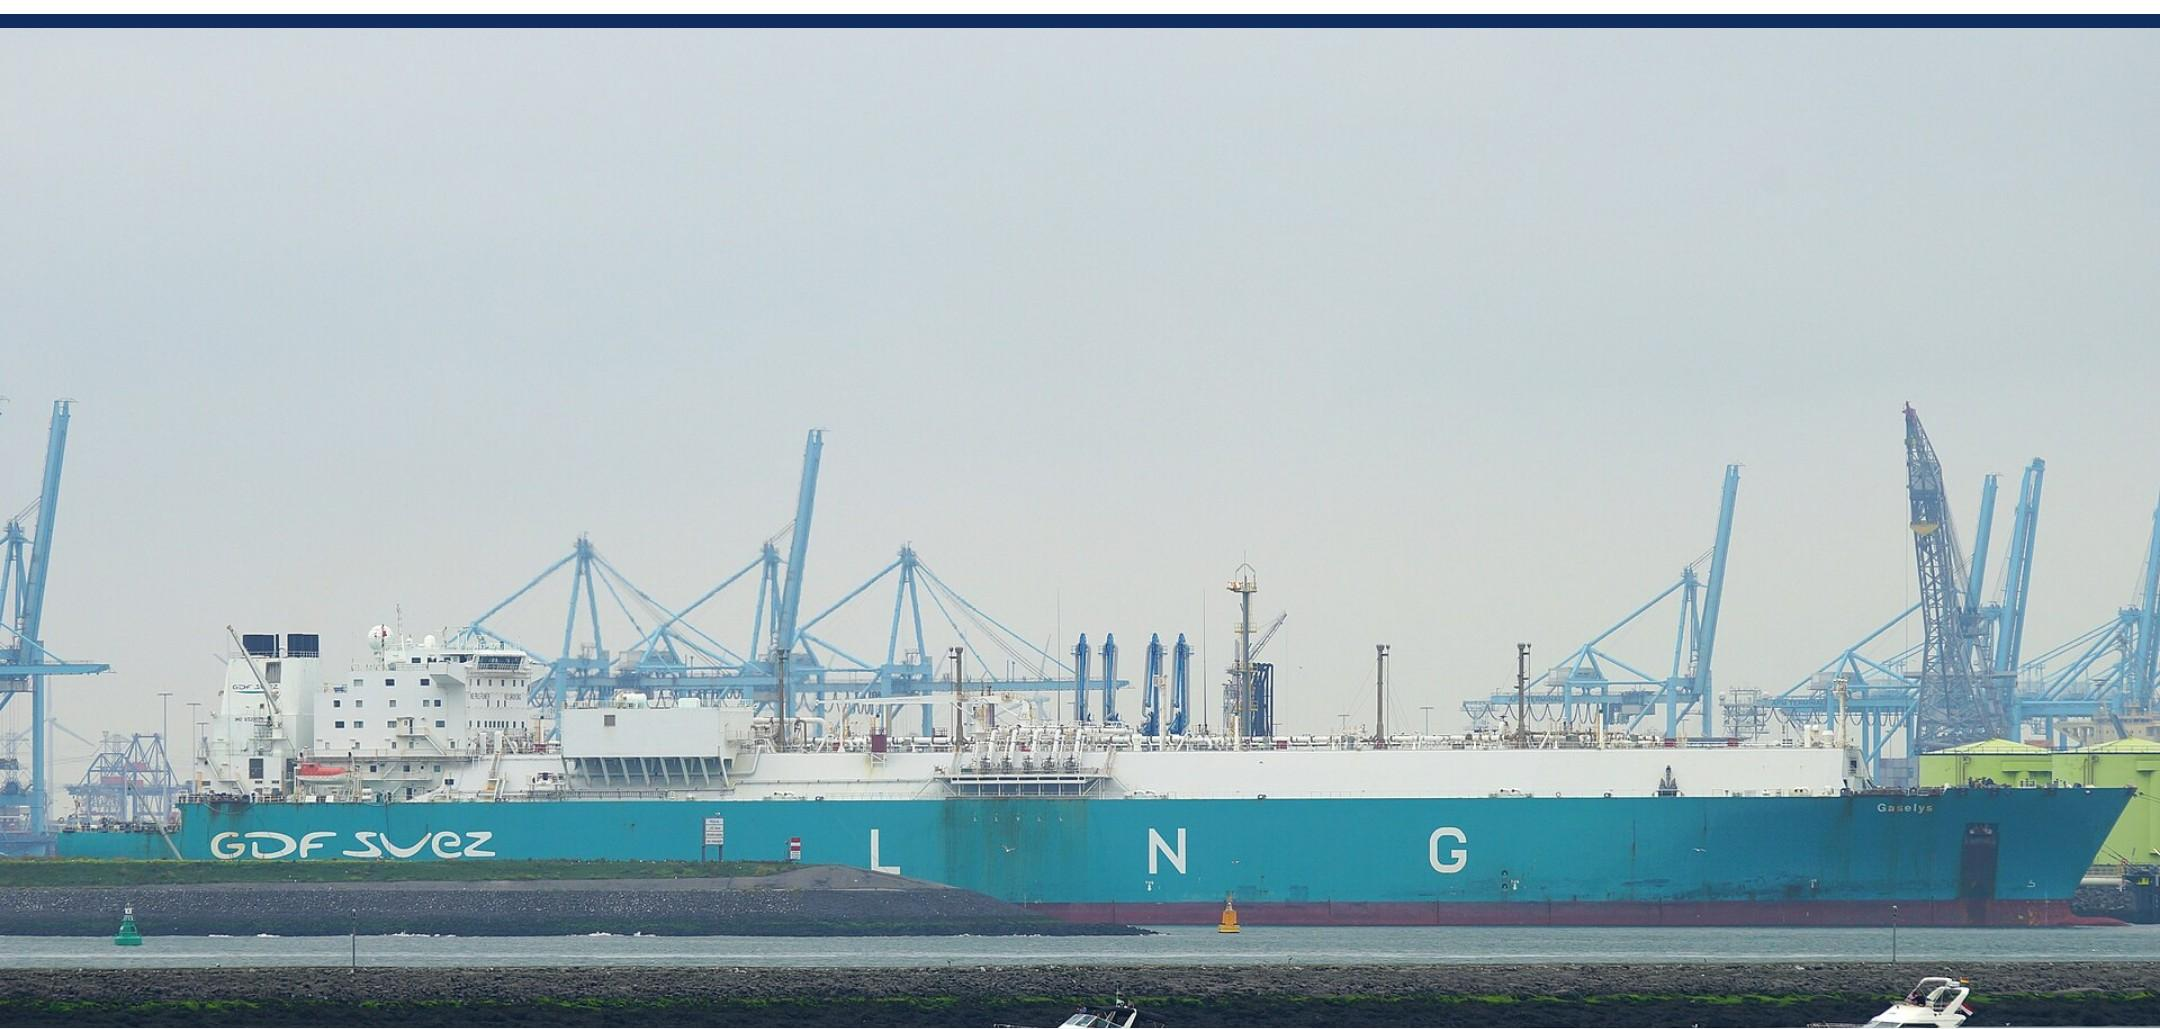

KEY FACTS

- ADNOC's chartering arm loaded about 1.5 million t onto 25 vessels for STS transfers off Sohar.
 - KPC shipped three cargoes totalling about 180,000 t; it did not respond to Reuters.
 - FGE NexantECA says direct Fujairah loadings and naphtha trucked from other UAE ports have picked up substantially.
-

WHAT TO WATCH

STS volumes off Sohar against last year's Aug-Sep baseline of about 5 million t. Trade data may undercount, as many vessels switch off transponders.

Critical

Energy

Strait of Hormuz

QatarEnergy extends LNG force majeure to end-November

18 vs 509

Qatar LNG cargoes exported, same period a year apart (ICIS)

Bloomberg reports QatarEnergy has pushed its LNG force majeure to end-November from end-October for buyers in Bangladesh, Pakistan and at least one in India. Edison says its cargoes will not resume until early December.

SIGNAL 3 OF 3 · WHY IT MATTERS

QatarEnergy extends LNG force majeure to end-November

WHY IT MATTERS

LNG traffic on the Hormuz lane (Gulf crude, LNG & products to Asia) remains largely blocked, keeping Qatari supply to Asia and Europe offline. Reuters calculated exports down as much as 96% and \$24bn in lost sales.

KEY FACTS

- QatarEnergy first issued the force majeure in April, after disruptions from the US-Iran war.
 - Last month, Edison's force majeure had been extended to early November.
 - Some Qatari and UAE LNG cargoes have recently transited Hormuz or used STS transfers outside the Strait.
-

WHAT TO WATCH

QatarEnergy's next notice before the end-November deadline, and whether Edison's cargoes restart in early December as the company expects.
