Energy

Putin decree puts Russian refinery and export data off-limits

3.8m b/d

Russian refinery throughput by June, IEA, down 30% y/y

Reuters reports that a decree Putin signed Monday bars public reporting of refinery production, export contract details, shipping routes and vessel coordinates at export terminals. The only exception is a company disclosing its own figures.

SIGNAL 1 OF 3 · WHY IT MATTERS

Putin decree puts Russian refinery and export data off-limits

WHY IT MATTERS

Buyers and charterers lose public data on Russian product volumes, buyers and routes. Oilprice.com links the decree to sanctions enforcement: the less the West can verify, the harder the price cap is to police.

KEY FACTS

- Customs statistics and planned sales volumes on commodity exchanges fall under the same rule
 - Ukrainian drones hit a Russian refinery every three days on average in Jan-Aug 2026
 - Gasoline output is down about 20% and diesel nearly 30%; shortages reported in 92% of regions
-

WHAT TO WATCH

Whether companies use the self-disclosure exception, and Reuters' reporting that Russian oil supply to India is tightening on reduced exports and strong Chinese demand.

UAE and Kuwait lift naphtha exports to Asia, sidestepping Hormuz

2

Gulf exporters named: UAE and Kuwait

MarineLink and Reuters report that the UAE and Kuwait have increased naphtha exports to Asia. Reuters, citing sources, says the flows sidestep the Strait of Hormuz.

SIGNAL 2 OF 3 · WHY IT MATTERS

UAE and Kuwait lift naphtha exports to Asia, sidestepping Hormuz

WHY IT MATTERS

This affects Gulf products going to Asia on the Hormuz lane. The reports give no volumes, routes or costs, so the size of the shift cannot be measured from today's material.

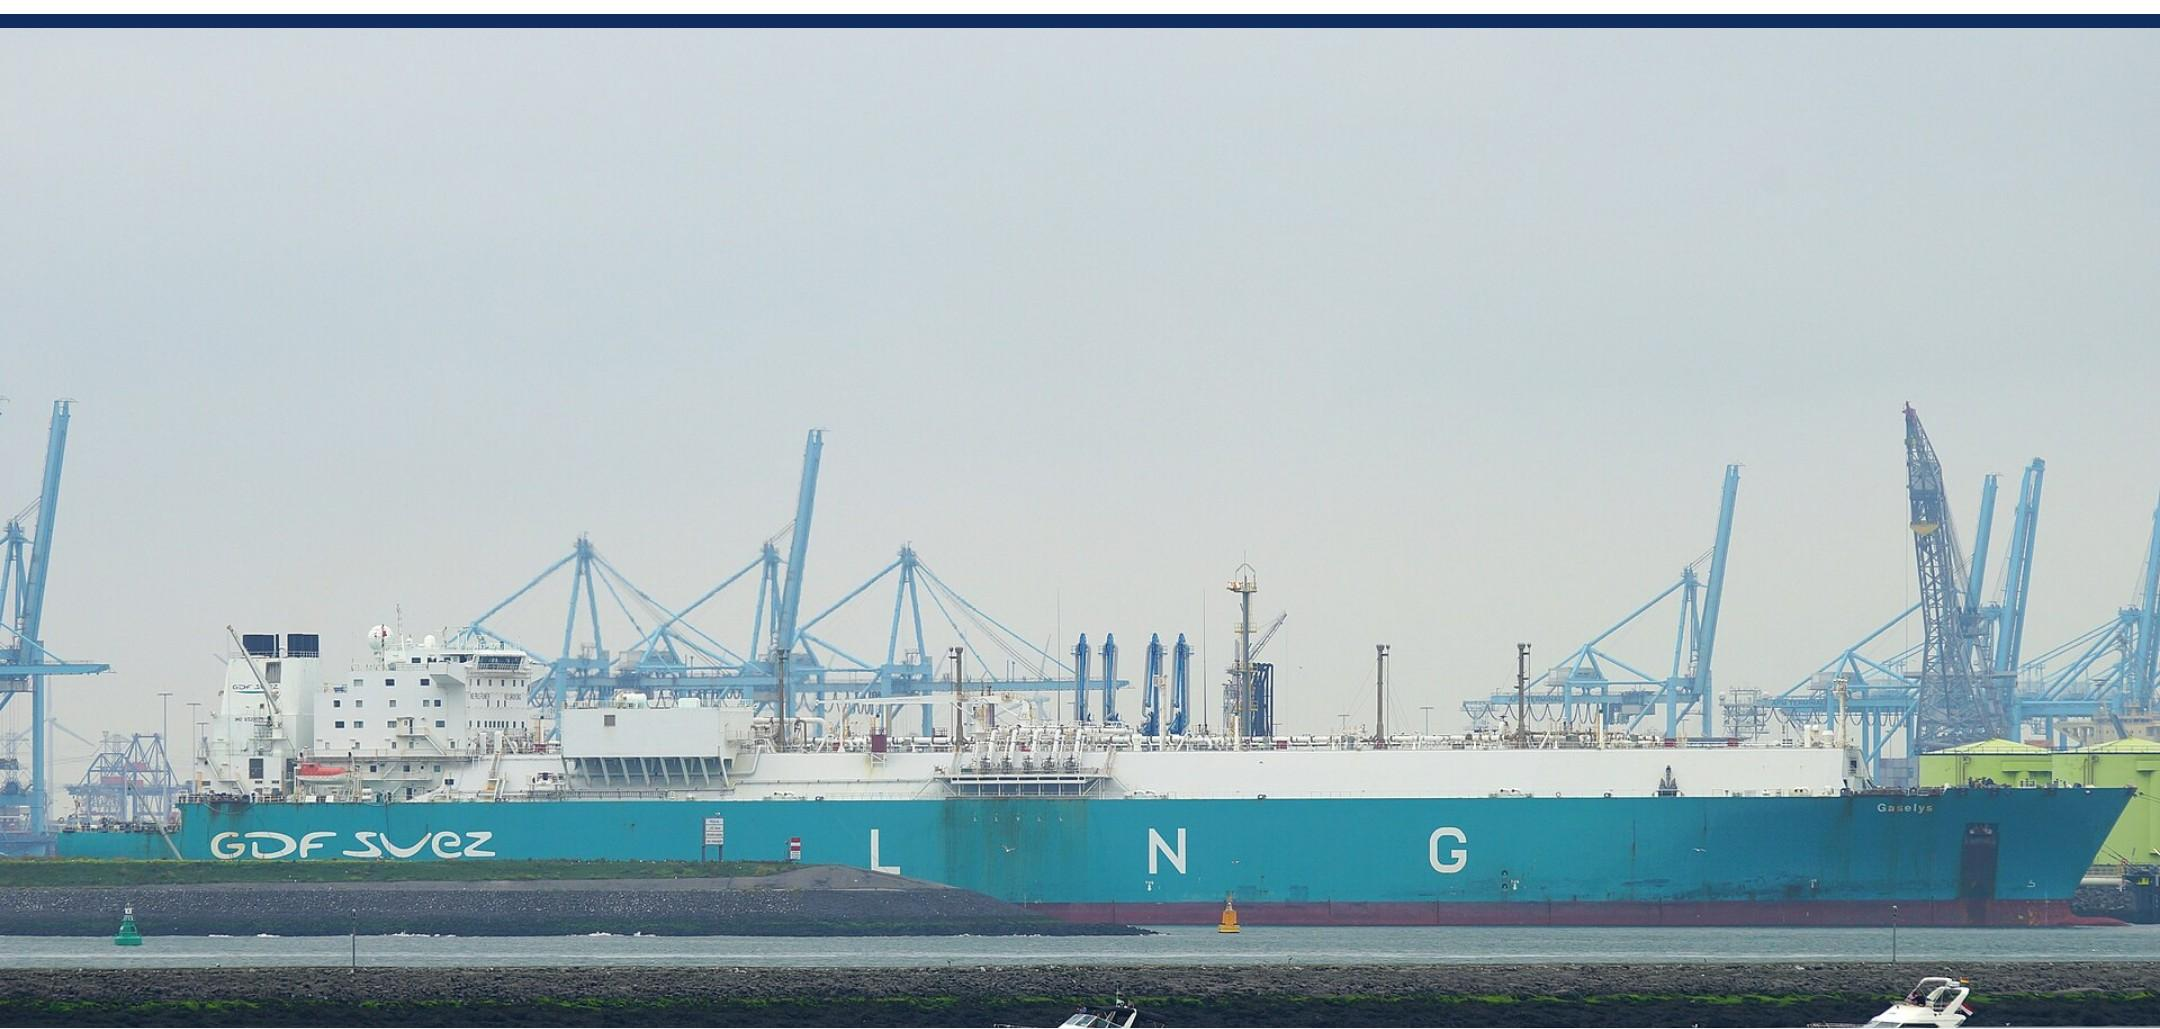

KEY FACTS

- Reuters bases the account on unnamed sources
 - Oilprice.com says neighbouring Gulf exporters have shipped oil secretly out of Hormuz
 - Hormuz logged 7 signals on the scan day, the most of any lane
-

WHAT TO WATCH

Whether follow-up reports put volumes or routes on the UAE and Kuwait naphtha flows. None are given in today's material.

QatarEnergy extends LNG force majeure to end-November

18 vs 509

Qatar LNG cargoes exported, same period a year apart

Bloomberg sources say QatarEnergy extended force majeure to end-November, from end-October, for buyers in Bangladesh and Pakistan and at least one in India. Edison says it will get no cargoes until early December.

SIGNAL 3 OF 3 · WHY IT MATTERS

QatarEnergy extends LNG force majeure to end-November

WHY IT MATTERS

Qatari LNG shipments to Asia and Europe through Hormuz stay largely blocked. Oilprice.com cites the continuing US-Iran stalemate over the chokepoint.

KEY FACTS

- Qatar has lost \$24bn in sales, with exports down as much as 96%, per Reuters calculations
 - The force majeure was first issued in April after disruption from the US-Iran war
 - The 18 vs 509 cargo count comes from ICIS data cited by Reuters
-

WHAT TO WATCH

The end-November expiry for Asian buyers and Edison's early-December date, and whether QatarEnergy extends again as it did last month.
